Unique Micro Design — ProtoLink Bar Code printing solutions

Introduction

The ProtoLink range of products provide a basis for many Bar Code printing solutions, by adding a Bar Code printer to models like the M335, M331 or M264, printing Bar Codes is as simple as UMD.

Fig. 3

M335 EAN Bar Code Printing System

Fig.1 shows an M335 configured as a complete EAN Bar Code printing system, using the M335 keypad and a scanner (optional) .

Enter the bar code data, a description and price and print the number of labels required.

Fig.2 is an example of a label with the EAN bar code and added description and price, the EAN bar code information entered by the operator is verified by the M335 that it is a valid EAN number. For each line on the label, data can be entered using the keypad, the scanner or an external keyboard.

When the operator is required to enter long descriptions, adding an external keyboard Fig.3, simplifies the data entry.
